## For Immediate Release

### **The New Ryson Narrow Trak Spirals are super compact vertical conveyors designed to handle small loads. They are great space savers with high throughput.**

Our nesting slats have the capacity to reliably end-transfer small cartons and packages or side-transfer small bottles or containers in a single file or in a continuous mass flow. The spiral conveyors are equipped with our new 6" or 9" wide nesting slats which provide an efficient flat conveying surface without gaps. These spirals can run at speeds in excess of 200 fpm.

The Narrow Trak spirals offer a significantly larger elevation change capacity than what is currently available in the small package marketplace. These spirals are also a good alternative to side gripper conveyors because they can run at high speeds and do not need to be adjusted for varying product sizes. This compact unit is equipped with the Ryson proprietary low friction chain slat arrangement which assures high capacity, high speed, low energy consumption, low maintenance and long life. This new model is especially beneficial for the food, beverage, pharmaceutical, nutraceutical and personal care companies.

Ryson products are crafted with great care in our modern manufacturing plant in Yorktown, Virginia. Our full inventory of spare parts enables us to provide the high level of service our customers have come to expect from Ryson. We are committed to a continuous product development program. Our engineers are busy with research and development projects which include making improvements to our existing products.

**RYSON**  
INTERNATIONAL, INC

**VERTICAL CONVEYING SOLUTIONS**

**Ryson is the number one Spiral Conveyor manufacturer in the USA.
